EDUCATION

The University of Texas at Arlington	**Master of Science in Computer Science**	Expected May 2018
University of Mumbai, India	**Bachelor of Engineering in Computer Science**	Graduated May 2016

INDUSTRIAL EXPERIENCE

Larsen & Toubro Infotech Pvt. Ltd. **Android App Developer Intern** **Mumbai, India (June 2015-July 2015)**

- Worked on porting iOS app to Android. The iOS app was a PDF reader called "iBoard" wherein users could have a PDF digitally signed by the owner of the PDF. The app was highly appreciated and then finally queued for deployment to the client.
- Created a PDF reader/ annotation editor. The functionality of the app is the same as iBoard app with added support to add a custom signature using a pen stylus or finger input. All code was reviewed by project manager and the team. Intern Team Leader.

ACADEMIC WORK EXPERIENCE

The University of Texas at Arlington **Graduate Research Assistant** **(July 2017 - Present)**

- Research Assistant for Radio Frequency and Auto Identification Labs at UTA.
- Worked on maintaining the official website for the lab along with developing Mobile Apps and backend solutions along with websites.

ACHIEVEMENTS

- **Majhi ST:** The idea to develop the app was to make commuting easy for those who use Maharashtra State Transport buses. The data for the application has been collected from different cities and villages. App on play store has a rating of 3.6 and has been downloaded and installed by 50,000 - 100,000 users: https://play.google.com/store/apps/details?id=com.i4infinity.majhist
- **Radio Frequency and Auto Identification Labs Website on the UTA public domain website:** Developed and maintained the website for the university's radio frequency lab on the UTA domain using WebDAV access: http://www.uta.edu/rfid

TECHNICAL SKILLS

- **Programming Languages:** Java, Kotlin, C, C++, Scala, SQL
- **Tools:** Google App Engine, Google Cloud Functions, Google Firebase Realtime Database, Adobe Photoshop, IntelliJ IDEA, Eclipse
- **Scripting Languages:** JavaScript, PHP, Bash
- **Frameworks:** Android SDK, Node.js, Bootstrap, Hadoop, Apache Spark
- **Operating Systems:** Windows, Linux, MacOS

PROJECTS

- **ISCT Journal Website:** Developed website for the International Supply Chain Technology Journal which is an international, peer-reviewed, quarterly journal about Supply Chain Technology Research http://www.isctjournal.com
- **ISCT Journal Manuscript Review Automation System:** Developed an automation system for the reviewers and users of the ISCT Journal which allows seamless submissions and review of the manuscripts uploaded using Google's Firebase Real Time Database and Storage Service along with Firebase Authentication http://www.isctjournal.com/system
- **RUGRAT – Android:** Developed a code generator for Android Layout XML files and Android Activity files by extending RUGRAT for testing the efficiency of the static analysis tools. https://github.com/adityamhatre/RUGRAT-Android
- **Shorthorn App:** Developed an Android App for news feed using Firebase as a backend for real time NoSQL database and notifications
- **Zappos App UI Prototype:** Made an Android UI Prototype for Zappos Challenge https://github.com/adityamhatre/ILoveZappos
- **Online Library Management System:** Developed a HTML/PHP website and MySQL database for an online library Management system

APP LISTINGS

- **Zeal 2k15:** This App was designed for the cultural festival of my undergraduate college. It is essentially a rulebook for all the events and games that were available during the festival: https://play.google.com/store/apps/details?id=com.adityamhatre.zeal2k15
- **Viazene:** This App is like Amazon but for women's apparel. The app also has a Facebook like feed page where users can upload photos and like, comment, share stuff among other users of the app as well as share the product link to other social media platforms as well: https://www.thelegacycoder.com/portfolio/Viazene
- **Fun the Tap:** This is the first app I ever made! It is a background with red text to show the current number of taps and the time remaining to timeout. Game which will count the user speed means how many times user can touch the screen in 20 second https://play.google.com/store/apps/details?id=com.fun.taptap
- **Why City?** App has a list of cities that when clicked, opens a new screen showing the relevant information. Also, some devices may show ads in the bottom section of the app https://play.google.com/store/apps/details?id=why.corporatecoders.why_city

RESEARCH

- **Internet of Things: Home Automation and Surveillance System:** Published a paper and worked on the topic by implementing Internet of Things by using Arduino microcontroller and made a companion android application to control home devices https:/www.thelegacycoder.com/research/iot/research.pdf
- **SmartGen: An extension to RUGRAT - Random Application Benchmark Generator:** SmartGen is a tool that extends RUGRAT and generates Android application benchmarks within specified constraints and predefined properties. https:/www.thelegacycoder.com/research/smartgen/research.pdf
